

As a member of the public and a shareholder in the publically owned airwaves I wish to voice my objections to the proposal to loosen ownership regulations in the media.

I beleive that this is desired only by the media companies themselves, not by the general public, as evidenced by the overwhelmingly negative comments the proposal has received at the public forums.

Loosening the regulations will have a deleterious effect on the quality and diversity of radio and television. I urge you to reject this proposed change.

Kim Cox
